Opening Stata files in Athena

Download the materials for the workshop into a new folder by doing the following:

1. From the top bar, select Places > Home Folder
2. In that folder, Right click and select Create Folder; name it "DataManagement"; open the folder
3. Open Firefox from top bar and navigate to http://libraries.mit.edu/guides/subjects/data/training/workshops.html and scroll down to the entry for Data Management in Stata
4. Download the following files into your DataManagement folder:
   a. Presentation slides
   b. Exercises
   c. Several datasets
   d. Stata Do-File

To download the files listed in a. – d., use the following steps:
   a. Right click over each link and select Save Link As
   b. From the pop up box, click on the + to Browse for other folders
   c. Navigate to the Stata folder you just made by double clicking on your username on the left and the "DataManagement" folder within the list on the right
   d. Select save in the lower right
   e. Repeat this process until you have downloaded all the files into the folder (you can also double-check as you should still have the folder open in another window)
